

Real-Time M&E Dashboard & Web

From reactive spreadsheets to a live,
unified view of every beneficiary
across Inuka's four pillars.

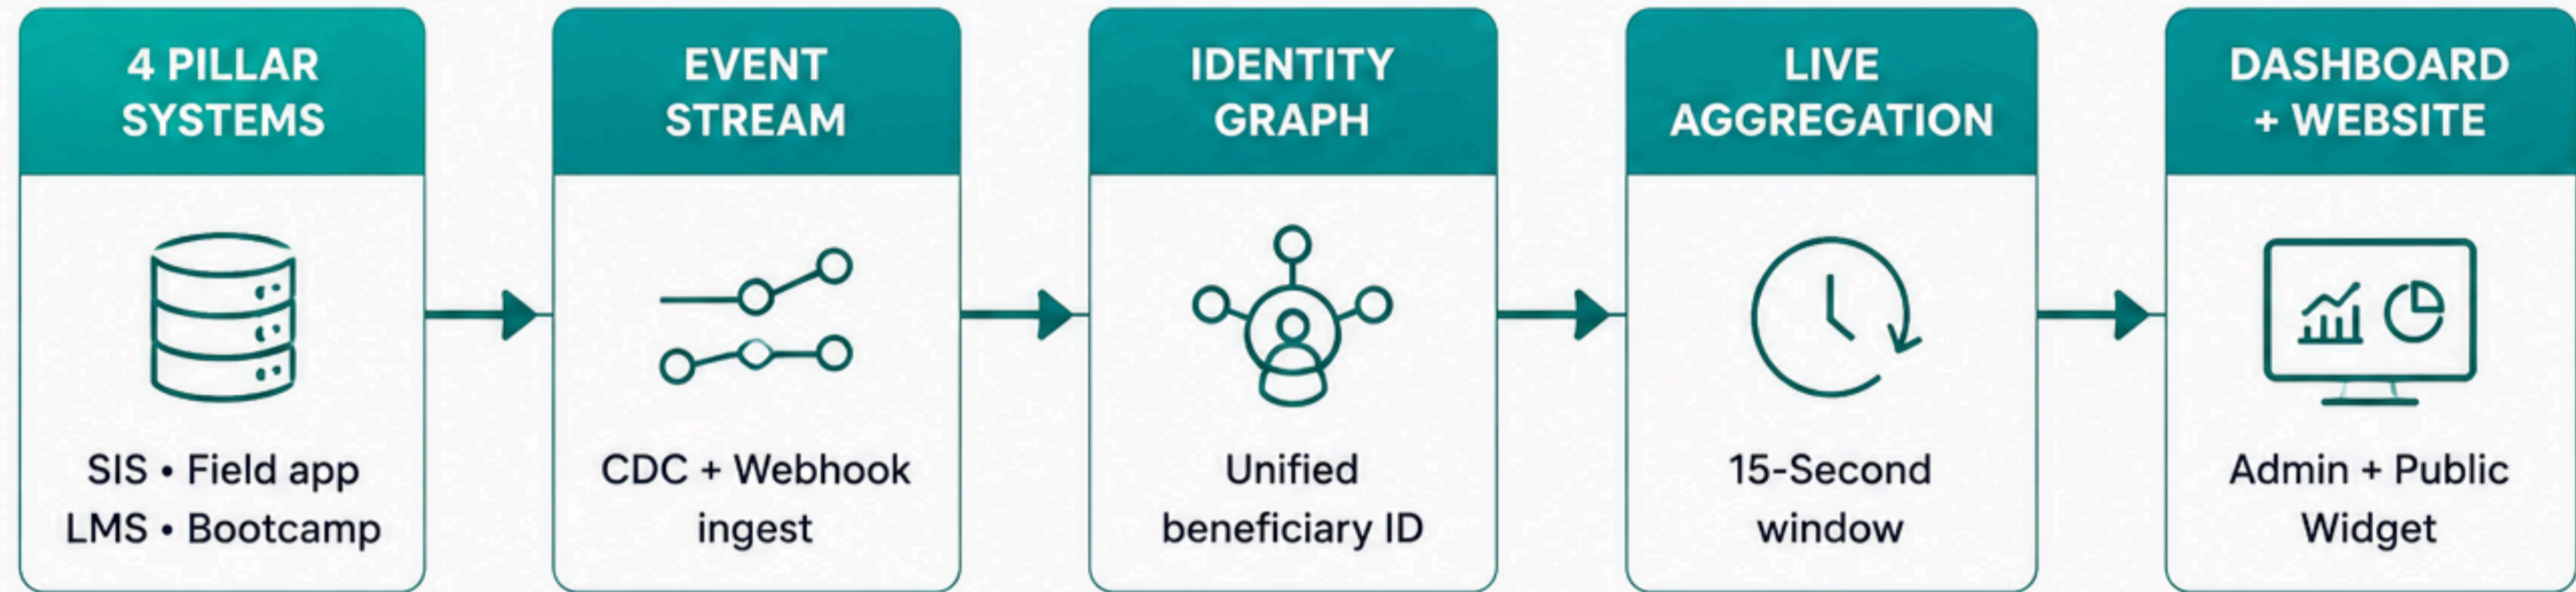

THE PROBLEM

Inuka Foundation's M&E reporting is fragmented, manual, and delayed, limiting real-time visibility into program reach, outcomes, impact, and performance.

Solution

Stage 1 gave us clean pipelines. Stage 2 makes them live.

WHAT THIS DELIVERS

ONE SOURCE OF TRUTH

Unifies beneficiary records across all pillars.

REAL-TIME INSIGHTS

Live dashboards for smarter decisions.

PUBLIC IMPACT

Share live results through our website widget.

FIELD READY

Offline data capture with seamless sync.

UNIFIED IDENTITY. COMPLETE VISIBILITY.

Solves the biggest gap: competitors often lack unified identity management.

Product

Inuka Pulse

One live view, four pillars, **zero spreadsheets**.

4 Pillars: Scholarship • Plus • Vocational • Tech
Deduplicated via one identity graph, updating live.

Target Market

Internal

- Program officers
- M&E Teams
- Foundation
- Leadership
- Board Members

- 12 officers currently involved in reporting processes.
- 4 program pillars integrated.
- 1 unified source of truth.

External

- Donors
- Partners
- Website Visitors
- Stakeholders

MARKET SIZE

Large, underserved, and ready for a unified solution.

MARKET LEVEL	BASIS	ESTIMATED OPPORTUNITY
 Kenya addressable universe	9,609 active PBOs	9,609 Organizations
 Core SAM Organizations with complex, multi-program M&E needs	Assume 15% have sufficiently complex multi-program M&E needs	1,440 Organizations
 Initial SOM	Capture 100 organizations over 3–5 years	100 Customers
 Illustrative annual contract	KES 180,000 average / year	KES 18M At 100 Customers
 Core SAM revenue potential	1,440 x KES 180,000 / year	KES 295M / year

OUR WEDGE:

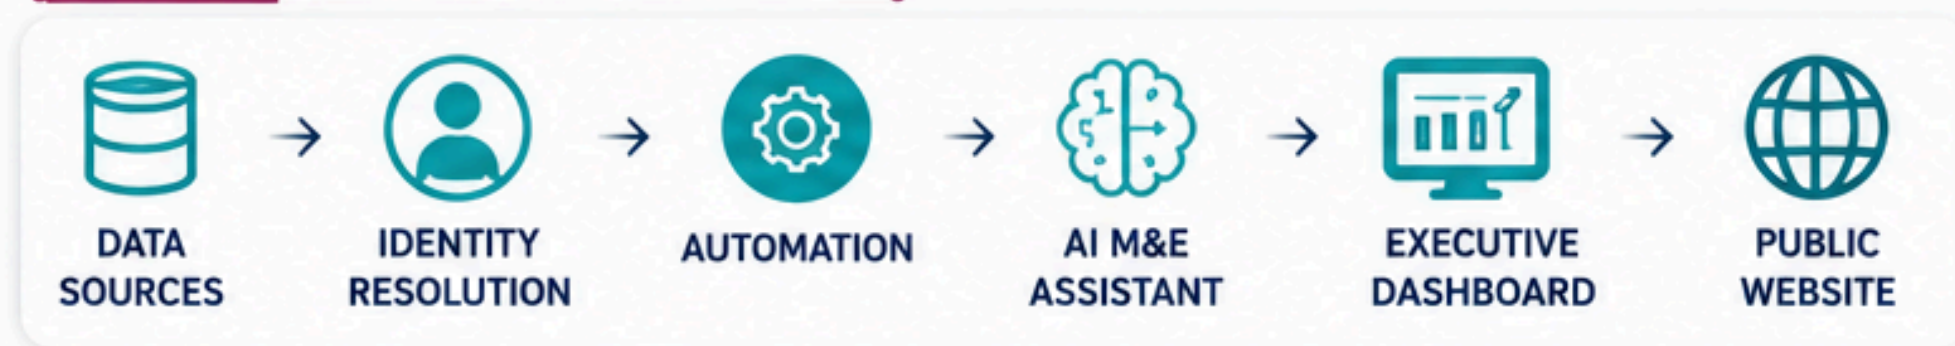

Move organizations from disconnected M&E tools and delayed reporting to **one real-time intelligence layer.**

Competitors

COMPETITOR	CURRENT APPROACH	LIMITATION
 Excel / Spreadsheets	 Manual consolidation	 Static Reports
 Historical information	 Static Reports	 Outdated insights
 Siloed Program Systems	 Duplicate beneficiaries	 Data integrity issues
 Traditional Dashboards	 Often lack unified identity management	 Security & compliance gaps

COMPETITIVE ADVANTAGE

What makes you unique?

WHAT MAKES INUKA PULSE UNIQUE?

- Unified Beneficiary ID Graph.
- Event-driven architecture.
- Real-time updates (22-second median freshness).
- Website integration without rebuilding existing site.
- Public and admin views from the same data source.
- Offline-first field operations.
- Built directly around Inuka's operational workflows.

End-to-End Intelligent M&E Platform

THE STRONGEST COMPETITIVE ARGUMENT IS INTEGRATION.

Most solutions solve one part of the problem.

Inuka Pulse connects:

Data sources → Identity Resolution → Automation → AI M&E Assistant → Executive Dashboard → Public Website

ONE PLATFORM

One integrated platform. No silos, no data fragmentation.

REAL-TIME INTELLIGENCE

Faster decisions with real-time data and insights.

LOWER COST

Leverage existing systems—no costly rebuilds or duplications.

STRONGER IMPACT

Better visibility, accountability and outcomes for all stakeholders.

PROJECT TRACTION

Building the data foundation and live platform in 5 months.

OUTCOME: A unified, real-time platform for all four pillars — clean data, one identity, live insights, and public impact.

BUSINESS MODEL

ENTERPRISE (CORE REVENUE)

KES 500,000–1.2M+/year

For large NGOs/development agencies

Multiple programs / countries

Custom integrations

Advanced permissions

Dedicated support

Custom donor reporting

Advanced analytics / API access

ADDITIONAL REVENUE

- Initial implementation: KES 100,000–500,000
- Data integration fees
- Custom dashboards
- Training
- Premium support

RECOMMENDATION: B2B SaaS + Implementation Model

IMMEDIATE VALUE

Reduced reporting effort

Improved data quality

Better donor transparency

Faster decision making

FUTURE MONETIZATION POTENTIAL

NGO Dashboard SaaS

Foundation Analytics Platform

M&E-as-a-Service

GO TO MARKET

The prototype is live and proven. Now we scale.

1. VALIDATE & PARTNER

Use Inuka Foundation as the design partner and validate product usability.

2. ACQUIRE & EXPAND

Acquire similar organizations facing the same challenges and expand through NGO networks and youth development programs.

3. SCALE & OPTIMIZE

Run the dashboard with real data to demonstrate impact.

Validate cost-avoidance through M&E results.

Conduct UAT with program officers and M&E staff.

GOAL: Establish Inuka Pulse as the trusted platform for unified data, live insights, and measurable impact across the social sector.

HOW WE REACH CUSTOMERS

...

01

LinkedIn & Professional Networks

Targeting M&E professionals, NGO directors and development – sector technology leaders.

02

Case-study Marketing with Measurable Outcomes

e.g. 43.5 officer Hours Reclaimed every week,
2–3 week reporting lag reduced toward near real time visibility.

03

Donor Ecosystem

for funding deployment for their
implementing partners.

04

Demonstration Led Selling

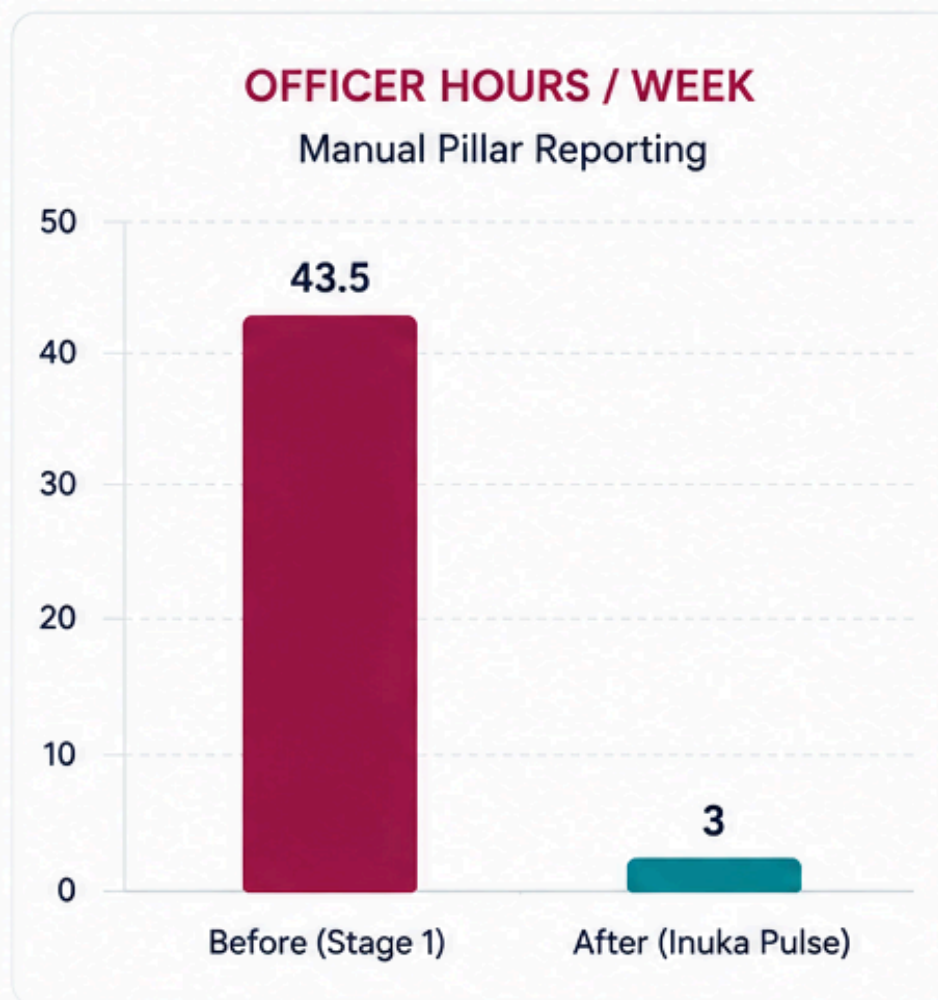

for a given existing reporting process
instead of selling the software.

REAL CONNECTIONS. REAL RESULTS. REAL IMPACT.

SOCIAL IMPACT & SDGS

43.5 Officer-hours A Week, **Back To The Mission.**

40.5 hours saved per week
More time for impact, less time on reports.

Reduction in quarterly donor & board reporting effort

85%

Auto-match rate resolving beneficiaries across pillars

96.8%

Illustrative officer-time value redirected to program delivery

~KES 2.0M / yr

ALIGNMENT WITH SDGS

SDG 4 – Quality Education

- Track scholarship retention and education outcomes.
- Monitor vocational and digital-skills programs.

SDG 8 – Decent Work & Economic Growth

- Track TVET employment outcomes.
- Track digital-skills employment and freelancing.
- Connect training outcomes with employer participation.

SDG 9 – Industry, Innovation & Infrastructure

- Strengthens digital infrastructure for development organizations.
- Promotes data-driven program management.

SDG 10 – Reduced Inequalities

- Enables better visibility into underserved communities.
- Helps organizations identify gaps in program reach.

OUR IMPACT: Enabling organizations to save time, improve outcomes, and deliver measurable change across education, employment, and equality.

Our Ask

Partner with us to accelerate impact, improve lives and scale transformation.

SUPPORT REQUESTED

Pilot implementation approval.

Enable a controlled pilot to validate impact and refine the solution.

Stakeholder validation of impact assumptions.

Confirm our assumptions with key stakeholders to ensure alignment and relevance.

Access to operational users for live testing.

Access to real users to test, validate and improve the solution in real-world settings.

Support for Stage 3 enhancements.

Resources and guidance to scale and strengthen the solution for long-term impact.

STAGE 3 PRIORITIES

Swahili/English toggle.

Enable seamless language switching to make the solution inclusive and accessible to all users.

Predictive analytics.

Use data to anticipate trends, identify risks and drive proactive decision-making for better outcomes.

Accessibility audit.

Ensure the solution meets accessibility standards for all users, including persons with disabilities.

Expanded user validation.

Broaden validation across diverse user groups to strengthen usability, acceptance and impact.

THE IMPACT

STRONGER VALIDATION

Real user feedback ensures we build the right solution.

SMARTER DECISIONS

Predictive insights drive better outcomes faster.

INCLUSIVE BY DESIGN

Accessibility and language support leave no one behind.

READY TO SCALE

Stage 3 enhancements unlock sustainable growth and impact.

Together, let's build a solution that transforms lives and creates lasting impact.

Your support today fuels a brighter, data-driven and inclusive tomorrow.

Stronger together. Greater impact.
